

# EVERGLADES *Wild Game*

*Always Florida, Always Natural!*

Ostrich Meat is praised as a healthy red meat, with low cholesterol, and high Omega 3. Healthcare professionals and accredited national healthcare associations recommend ostrich meat for healthier diets. With this in mind, two physicians that had experienced difficulty in finding ostrich meat, decided to start their own ostrich farm, in Florida. Historically the ostrich meat available in the marketplace has been more of a bi-product for the hide and plumage industry. The goal of this farm is to raise all natural ostrich, with room to move in open air, without the use of antibiotics, to produce the best tasting ostrich meat in the market. The doctors are personally involved in the process from the eggs hatching, all the way through harvest. The results of their efforts can be tasted in every flavorful bite of this lean, well balanced protein.
