

IQF

Pomegranate Seeds

Pomegranate Seeds (arils) provide the consumer with tangy pomegranate flavor and powerful antioxidants year-round. Color sorted for uniformity from 100% premium California pomegranates.

These arils are IQF Frozen so they can be stored in your freezer and specific amounts can be taken out as needed. The uses are endless but some suggested uses are simply as a garnish for salads or desserts or in the baking and pastry kitchen to produce tarts, breads, muffins, souffles etc. Behind the bar they are great as an interesting finish in martinis, champagne cocktails or muddled in mixed drinks.
